

BAS Research Update Meeting 2025
Summary by Michelle Kennedy

June saw the annual online Research Update Meeting taking place-with 6 speakers presenting their current and completed aphasia research projects over a morning session:

- Susie Williams, from East Suffolk and North Essex Foundation Trust, shared her PhD proposal on communication and wellbeing in speech and language therapy for people with acute fluent aphasia.

- Lotte Meteyard and Arpita Bose, from the University of Reading, outlined their work on DALIP (the Database of Acquired Language Impairment Profiles) which is a shareable database of assessment data collected from PWA. They are actively recruiting PWA to participate in this project and their recruitment poster will be shared with their slides.

With gratitude to all our brilliant speakers-this was an inspiring half day of sharing across a broad range of research areas!

Please find the slides for the presentations on the BAS website with speaker contact details.
